## Office Talks

**Kasun Jayasinghe**  
- Vice President -

We are experts in around 40 technologies related to Frontend, Backend, cloud, other tools and technologies used in the current software development industry. As a company majoring in US healthcare domains and catering solutions to fortune five hundred companies security is our major concern and we are compliant with HIPAA. The level of quality and performance of solutions we provide makes us ahead of the competition. Our quality management system which has ISO 9001 standards. Also our development process and practices of continuous integration, continuous delivery or continuous deployment (CICD) with automated code, checks vulnerability checks and automated system test scripts bring consistency to our developments.

Our technically skilled staff is the backbone of the company. With the help of learning organization culture we got the chance to grasp new technologies and develop as a team enabling us technically be a savvy company. The low code practices we follow and our skillset on AWS / Azure SAAS technologies such as readily enabled authentication services (Cognito/ Azure B2C) enhance our speed of delivery without compromising performance security, performance, or quality. Knowledge in cloud technologies is a leading strength both in AWS and Azure and also orchestration technologies (docker / Kubernetes) which enable to provide solutions with high security and performance while generating minimum run time cost for the clients fluctuates based on the demand.

# Events

## ChampSoft Day Outing Kukulegaga

We have organized the yearly - day outing event on 3<sup>rd</sup> of September at Kukulegaga Resort.

It was a successful event and every one enjoyed.

This was the First day outing after the Covid pandemic. and every one came together to create some unforgettable fun memories!

We appreciate who participate the event.
